

Lesson 2-2**Solving Multistep Inequalities
and the Number Line**

Set 2-2a

Solve each inequality

and graph the solution on a number line.

1) $2x > -4$

2) $-3x \leq 6$

3) $2x - 2 < -4$

4) $-4(x - 1) \geq 1 - x$

5) $6x - 3 > -3x + 15$
