

Finding X- and Y-Intercepts

Set 4-3a

Find the x- and y-intercepts:

1) $y = x + 3$

2) $y = -3x$

3) $2x - 3y = -5$

4) $\frac{1}{3}x = \frac{4}{5}y$

5) $\frac{2}{3}x - y = 4$
