

Finding X- and Y-Intercepts

Set 4-3b

Find the x- and y-intercepts:

1) $-3x = y + 2$

2) $3x + 6y = 27$

3) $-5x + 8 = y$

4) $\frac{4}{3}x - 2 = \frac{1}{3}y$

5) $\frac{4}{7}x + 3y = 8$
